Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The prior art of record does not disclose or suggest, *inter alia*, a biological light measuring instrument comprising; light irradiation means for irradiating light beams from a plurality of light irradiation positions to a subject; light detection means for detecting light beams irradiated from said plurality of light irradiation positions and passing through the inside of said subject at a plurality of detection positions arranged near said plurality of light irradiation positions; signal processing means for preparing a topographic image representing ecological information about the inside of said subject by using quantities of light detected by said light detection means at the individual detection positions, and memory means for memorizing a three-dimensional morphological image of said subject and reference points set thereon, wherein said signal processing means includes: means for setting three-dimensional coordinate data indicative of the positional relation between said light irradiation and light detection positions and reference points set on said subject; means for generating a three-dimensional topographic image on the basis of said three-dimensional coordinate data; and means for superimposing said three-dimensional topographic image onto said three-dimensional morphological image based on said set reference points.

Concerning the section 102(b) rejection using Shahidi, the examiner agrees with applicant in that the cited reference does not disclose or teach "light detection means for detecting light beams irradiated from said plurality of light irradiation positions and

passing through the inside of said subject at a plurality of detection positions arranged near said plurality of light irradiation positions".

Concerning the 103(a) rejection, since Shahidi does not disclose all the elements of the pending independent claims, the rejection is considered improper and is hereby withdrawn. Based on the above observations, claims 1-25 are allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
